Dear Mr. Weisberg,

Thanks for replying to my recent letter, as I have read as many books on the assassination as possible, I am very much interested in any opinions anyone has on the subject.

Perhaps I can be of some financial help to you in the near future, as I enjoy your work ~~so~~ much. I previously stated a opinion that I thought Oswald was the killer, I am sort of leaning in the other direction, but am not sure on that yet, I am trying to get the book "The second Oswald or "Fake Oswald" Some of the question below are somewhat confusing and I can't clear them up completely, as everyone seems to have a different opinion one way or another! How did you get so much information it is very amazing!

possibly statement 11

Why have so many people been killed one way or another that were connected in some way or another with the assassination?

Why have there been so many books written critizing the Warren Commission?

Anyone could tell the Warren Commission didn't do the job? Why didn't congress do something

Can the case be reopened ??

Where was Oswald going after he went back to his room? after the assination

Was it Tippet's patrol car that came by the house and honked its horn?

What was the "offical" result of the paraffin test made on Oswald after he was captured in the theatre?

Why were the 3 rifle shells so neatly on the floor of the 6th floor of the Book Dep.?

The one thing that leans me heavily toward the innocence of Oswald is the test ride he took at the Lincoln-Mercury dealer about 2 weeks prior!!

Can the Salesman positively identify that Oswald was the customer!!

Why is the Tippit killing so confusing no one can make a positive I.D., yet people were close by.

Why is the Police + F.B.I + everyone connected with the investigation Covering up true facts? There has got to be a reason.

I would like you to keep pushing this!

I will help in anyway possible

Al. Newton
